| <p>Title of the project</p> | <p>STP Footprint. (Stepping forward in Surrey Heartlands)</p> |
| <p>Sponsor Name, Title, Host Organisation</p> | <p>Dr Roselle Herring</p> <p>Joint Clinical Lead Surrey Heartlands Diabetes Programme and Clinical Director for Diabetes and Endocrinology, Royal Surrey County Hospital</p> <p>North West Surrey CCG</p> |
| <p>Explain the project in one sentence</p> | <p>Identifying the contributory factors for the high major amputation rates in people with diabetes across Surrey Heartlands STP and recommending areas of change/best practice to reduce risk and improve outcomes for people with diabetes.</p> |
| <p>Tell us about the project and sponsor in no more than 175 words</p> | <p>National Cardiovascular Intelligence Network data during 2014/15- 2016/17: reported North West Surrey CCG as having a statistically higher rate of major amputations when benchmarked against the England rate. There were 60 major amputation procedures performed, giving a directly age and ethnicity standardised rate of 12.0 major amputations per 10,000 population-years. In comparison, Surrey Downs and Guildford and Waverley CCG were not statistically different.</p> <p>The STP footprint project will explore the contributory factors for the high major amputation rates. It will involve multiple stakeholders as citizens transition between care providers. The underlying causes are likely to be multifactorial.</p> <p>Key objectives will be to map the patient referral pathways across the three CCG's</p> |
