

<b>Title of the project</b>	Quality Improvement across the End of Life pathway across central Sussex north and east Surrey
<b>Sponsor Name, Title, Host Organisation</b>	<p>Dr Des Holden            Medical Director, Surrey and Sussex Healthcare NHS Trust (SaSH)            Medical Director, Kent Surrey Sussex Academic Health Science Network (KSS AHSN)            Medical Director, Health Innovation Network (HIN, the South London AHSN)</p>
<b>Explain the project in one sentence</b>	Although end of life will come to us all, the design of care is a cultural and organisational wicked problem you will help improve in partnership with health and social care providers, academia and industry and significant project support.
<b>Tell us about the project and sponsor</b>	<p>Take advantage of this unique opportunity to be embedded in a transformational change programme for End of Life Care (EoLC) in the heart of Sussex and East Surrey STP.</p> <p>Under the guidance and mentorship of seasoned Darzi sponsor, Dr Des Holden, and the wider STP leadership, you can choose from a suite of complementary projects that suit your clinical skill set and interest, covering delivery of local and national priorities for improving EoLC. This is healthcare innovation with an enormous potential reach, where improvements will also impact on dementia, frailty, LTCs care.</p> <p>We've developed a vision statement and a detailed project plan with enough flex for you to influence, we've collected and synthesised local, national &amp; international good practice with a view to what can work &amp; deliver quick wins work. You will have a comprehensive team already in place around you to ensure you truly shine, and plenty of opportunities to present, publish and progress in your career.</p> <p>We will also support you with training in Danish user-driven design principles, including how to define 'wicked problems' according to the needs of citizens, carers and professionals and how to test potential solutions (both high and low-tech) iteratively with citizens using a 'living lab' approach.</p>
<b>What skills are you looking for in a fellow?</b>	<ul style="list-style-type: none"> <li>• Comfortable with change, disruptive, innovative, committed, excellent communicator with a flexible approach, generosity of leadership style</li> <li>• Passionate about putting people first - and designing new models of</li> </ul>

	<p>care around user needs</p> <ul style="list-style-type: none"><li>• Interested in innovating with technology (including artificial intelligence and the Internet of Things), but only if it responds to user needs</li></ul>
<p><b>Who to contact and what do they look like?</b></p>	<p>Des Holden and Guy Boersma Medical Director SASH and KSS AHSN (pictured here with Guy Boersma, Managing Director, KSS AHSN)</p>  <p>Project manager Jacqueline Joyce</p>  <p><b>Other members of our team who have committed to support and mentor you on this project include:</b></p> <p>Patricia Brayden, Medical Director, St Catherine’s Hospice and STP Clinical Lead of EoLC</p>  <p>Minesh Patel, Clinical Chair, Sussex and East Surrey STP</p>
